Q58_1. The coronavirus pandemic has resulted in significant consequences for the country, with 10 million newly unemployed in just two weeks and estimates of 100,000 to 240,000 Americans who may die as a result. Who do you blame for that?

Please read the following and afterwards, indicate which you agree with more.

Some people are saying that because the Chinese government withheld information about the severity of the early spread of coronavirus, the federal government didn't have the information necessary to properly prepare for the threat.

Others are saying that there was plenty of evidence that coronavirus posed a serious threat as early as January, but the federal government ignored intelligence briefings and simply failed to prepare adequately for this crisis.
