Q59. [HEALTH CARE] Which statement do you agree with more, even if neither fully represents your view?

Statement A: To lower health care costs, the government should do more to lower drug costs for Americans and hold big drug and insurance companies accountable for price gouging consumers.

Statement B: To lower health care costs, the government should be less involved, giving Americans more choices in the coverage they get and cutting regulations that slow innovation in creating new medicines and cures.

Statement A: When it comes to issues of gender identity, we should trust families and their doctors to make health care decisions for themselves and their children and not allow politicians to insert themselves into these decisions.

Statement B: The transgender movement has gone too far: We need to stand up to dangerous ideas like taxpayer-funded sex change surgeries and letting biological men compete in girls' sports.
