Below are some statements from supporters and opponents of Trump's plan to increase tariffs. Please read the statements and answer the question that follows.

Some say increased tariffs would be a tax on all imports, increasing prices on almost everything we buy – like clothes, cars, and washing machines. The average American would pay more than $1,500 a year in higher prices.

Others say increased tariffs on all imported goods to the U.S. would make American-made products more competitive. It would protect American manufacturing and bring new companies to the U.S., as well as be a tool to force countries to crack down on drug trafficking and illegal immigration into the U.S.

Q59. After reading those statements, do you support or oppose Trump's tariff plan?
